

GAP ANALYSIS SERVICE: SUPPORTING YOUR UNDERSTANDING

WHY CHOOSE MSS GLOBAL?

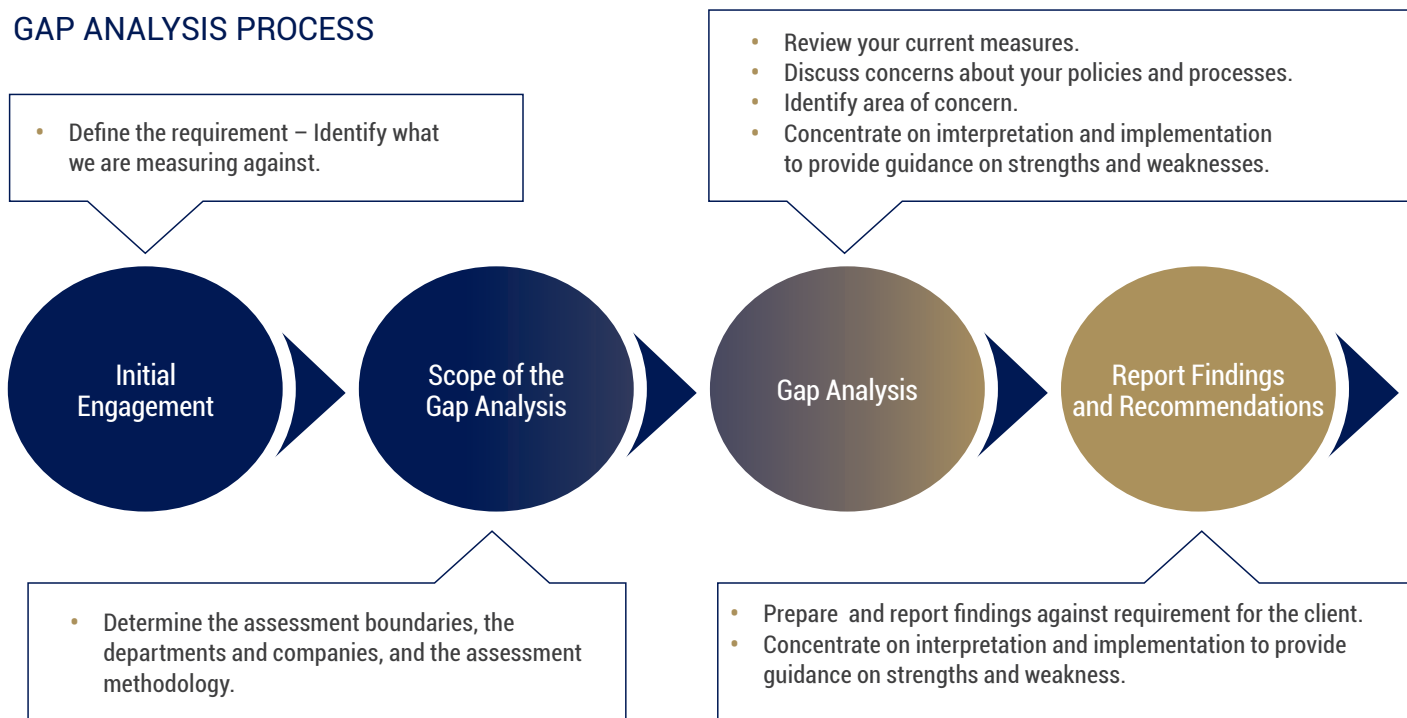

MSS Global is the only internationally accredited Certification Body providing certification of your operations or your supply chain across a mix of regulatory, contractual and ethical commitments, or other specified requirements to include the following ISO standards:

- Quality (ISO 9001)
- Environment (ISO 14001)
- Health & safety (BS OHSAS 18001)
- Security operations (ISO 18788)
- Private security company (ANSI PSC.1)
- Supply chain security (ISO 28000)
- Armed maritime security (ISO 28007)
- Anti Bribery & Corruption (ISO 37001 – non accredited)

We are able to validate performance against any combination of international standards, contractual and regulatory requirements, or ethical commitments. We are uniquely qualified to offer these services in some of the most complex and challenging operating environments around the world.

With a strong business, risk management, and ethics background, we understand your certification requirements and associated business pressures. Our language is the same, and nothing is lost in translation or understanding. Our Gap Analysis services help your company understand the practical requirements of the pertinent standards or requirements.

GAP ANALYSIS PROCESS

GAP ANALYSIS SERVICE

- Our gap analysis service reviews how your company has already addressed, or plans to address all your identified requirements – be they international standards, contractual and regulatory requirements, or ethical commitments (including CTIPs, the UN Guiding Principles, VPSHR, or the ICoC for PSSPs.);
- It provides you with opportunity to discuss any concerns you may have about your policies and processes, or the certification process;
- The analysis will help you identify any areas of concern within your control;
- Our assessor will use a sampling technique that allows them to concentrate on interpretation and implementation of the requirements; this then supports the assessment provided to you on the strengths and weaknesses of your system;
- We will work directly with your team to ensure that our assessment is designed to best support your company; this is your company, not ours, and therefore any actions identified must be effective for you;
- This is not consultancy; we do not tell you what to do, rather we provide you with a clear work pathway that allows you to generate internal competence through growing self-confidence;
- The Output is two-fold:
 - An action plan developed for and with your team that allows you to move forward coherently;
 - Our assessor will also advise you of a realistic time line for any external assessment.

IF SEEKING ISO CERTIFICATION

- Once the actions highlighted in the plan have been implemented, we can undertake our two-stage certification assessment;
- The certification assessment process is a pathway; you cannot fail as long as you address any areas that are needed for conformance to the standard by the end of the assessment process;
- See our separate service sheets for more detail on the individual ISO standards certification process.

SUPPORTING INFORMATION

Cost:

Enquire for the latest pricing as it depends upon your specific requirements and scope of services.

Booking Our Gap Analysis:

- Request a pre-assessment questionnaire from us to allow us to scope the size of the task and provide you with an accurate quote.
- We will then agree with you a time-frame for the Gap Analysis service.
